

Instructions: How to set up the „MetaMask” desktop wallet in 3 steps

1. Install the MetaMask Wallet

2. Connect MetaMask to the RealUnit Token

3. Access your MetaMask Wallet after the set up process

1. Install the MetaMask Wallet

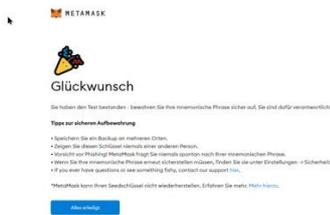

Open the following page on your browser: <https://metamask.io/download/>

Click on **Download** and then on **Install MetaMask for Chrome**.

Click on **Add** at the top right and confirm by clicking on **Add Extension**.

MetaMask is now installed as an extension in your Chrome or Brave Browser.

Create a new wallet by following Metamask’s step-by-step instructions.

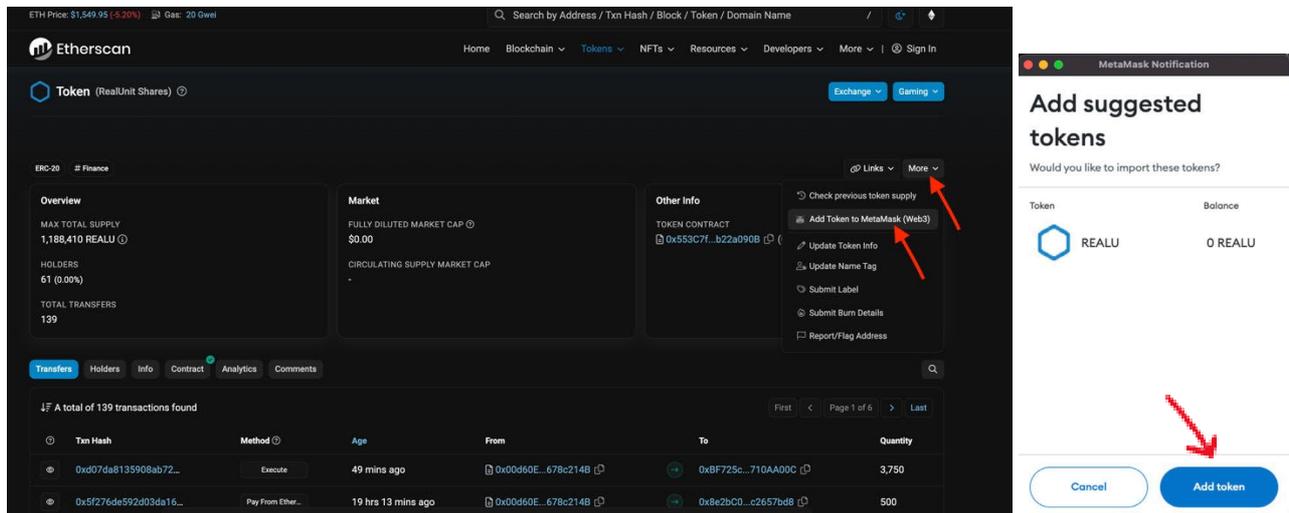

2. Connect MetaMask to the RealUnit Token

Open the following page on your browser:

<https://etherscan.io/token/0x553C7f9C780316FC1D34b8e14ac2465Ab22a090B>

Click on **«More»** and then click on **«Add Token to MetaMask (Web3)»** in the submenu as shown below. Then click on **«Add token»** in the Metamask window.

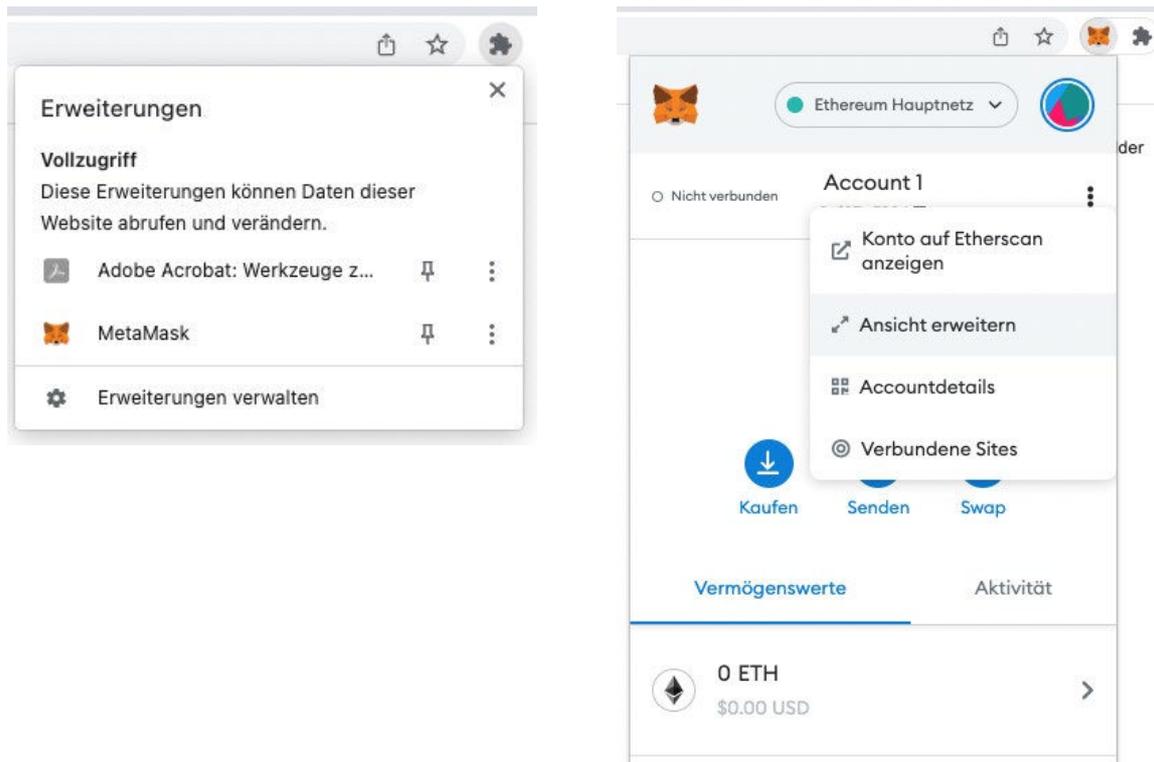

Congratulations! You have successfully set up your Metamask wallet. To purchase the RealUnit Token you now need to register your wallet with the company, which you can do by filling out the form you’ll find on “Step 3” on this page: <https://realunit.ch/realunit-kaufen/#token>.

3. Accessing your MetaMask Wallet after the set up process

If you want to close your Chrome browser with the MetaMask extension and open it again at a later time, this is how it works:

On the top right of your Chrome browser you will see all the active extensions. Click on **MetaMask**. A small window will appear, which can be enlarged. To do this, click on the menu button with the three dots in the top right corner and then click on **Expand View**. You will now see your MetaMask Wallet.

If you encounter any problems or if you have any questions, please contact us at info@realunit.ch. We will be happy to help you.
